

Company Overview

Atrya Industrial Metal has been playing an active role in the global market as one of the largest manufacturers of steel in the Middle East for many years. This company operates strategically to produce various types of steel products using the most advanced technology and global standards, industrial management, as well as experienced technical staff in the production of rebars, ingots, sponge iron and briquettes. Atrya Industrial Metal has achieved valid international production standards, and currently this large company is able to provide many traders in the world with their desirable amount of supply. We will spare no effort to gain customer trust and satisfaction so as to be the most reputable manufacturer and supplier of steel in the world.

Business Description

The production and consumption of steel experienced a spiral increase throughout the world in the twentieth century, and countries such as the United States, Brazil, Germany, China and South Korea became the best producers of steel. The iron and steel production has been profitable in developed countries like the United States with an approximately 150 billion dollars profit in 2010, and a production of 95 million tons of crude steel in 2011. Currently the United States owns %6 of the world crude steel production. Observing all the global standards, Atrya Industrial Metal as one of the largest manufacturers of steel in the Middle East, strives to meet the needs of all traders and customers around the world.
